# UK2AAA eLED MINI POCKET LIGHT

## INSTRUCTIONS & IMPORTANT INFORMATION

Thank you for purchasing the UK2AAA eLED Mini Pocket Light. It includes the latest LED technology and is incredibly bright, compact and ready when you need it. Since 1971, UK has been designing and manufacturing lights for the harshest environments. Our lights are used by fire fighters and workers in extremely tough industrial situations. They are a standard for scuba divers. With minimal care your UK light will give you years of trouble-free service.

### Battery Insertion

Unscrew the bezel/LED assembly. Insert 2 alkaline AAA-size batteries as shown in the diagram. The batteries must be inserted with the plus + end facing the eLED module or the light will not operate. Make sure the O-ring and sealing surfaces are clean. Replace the bezel/LED assembly by twisting it clockwise onto the case.

### On/Off

Screw the bezel down by twisting it clockwise until the lamp comes ON. Turn the light OFF with at least 1 1/2 counter-clockwise turns of the bezel.

### O-Ring Seal

The O-ring and sealing surfaces must be kept clean and lubricated with silicone grease in order to maintain the watertight seal and smooth rotation of the bezel. During cleaning remove the O-ring using only your fingers. Do not use tools which can damage the O-ring and sealing surfaces.

## Limited Lifetime Warranty

UK International products are engineered for maximum performance and durability. All products carry a Limited Lifetime Warranty to the original retail purchaser to be free from defective material and workmanship under normal and intended use. In addition, the UK International Limited Warranty covers materials used in its products to the original purchaser, from the date of purchase, as follows: plastics for 10 years; fabrics and rubber for 3 years; rechargeable batteries for 90 days; and lamps for 30 days (batteries and lamps are not manufactured by UK International).

In the event the original retail purchaser detects a defect in the material or workmanship, the product along with proof of purchase date should be returned to an authorized UK International dealer or directly to UK International with the postage prepaid. UK International agrees to repair or replace at UK International' sole discretion any product found to be defective in material or workmanship within the time period specified above. For the complete Limited Lifetime Warranty write to UK International.

Address all correspondence and returns to:

### Care and Maintenance

- Keep the area around the O-ring seals clean.
- If the light floods with water, empty the contents immediately, rinse with fresh water and dry completely before reassembly.
- To insure that active hydrogen removal catalyst is present in the light, replace the bezel/LED assembly if it gets wet.
- Do not store batteries in the light for long periods of time. They may leak and damage the light.

## CAUTION

Batteries which are (1) loaded without observing the proper polarity, (2) are not the same type, brand name and age or (3) are completely discharged can vent hydrogen gas and possibly cause an explosion.

- Load batteries according to the diagram shown below.
- Do not mix batteries of different type, brand name or age.
- Discard all batteries as soon as they are drained or no longer produce light.
