

130 Lumens of Bright, White Power.

From a Tiny, 6 Watt LED.

(now that's progress)

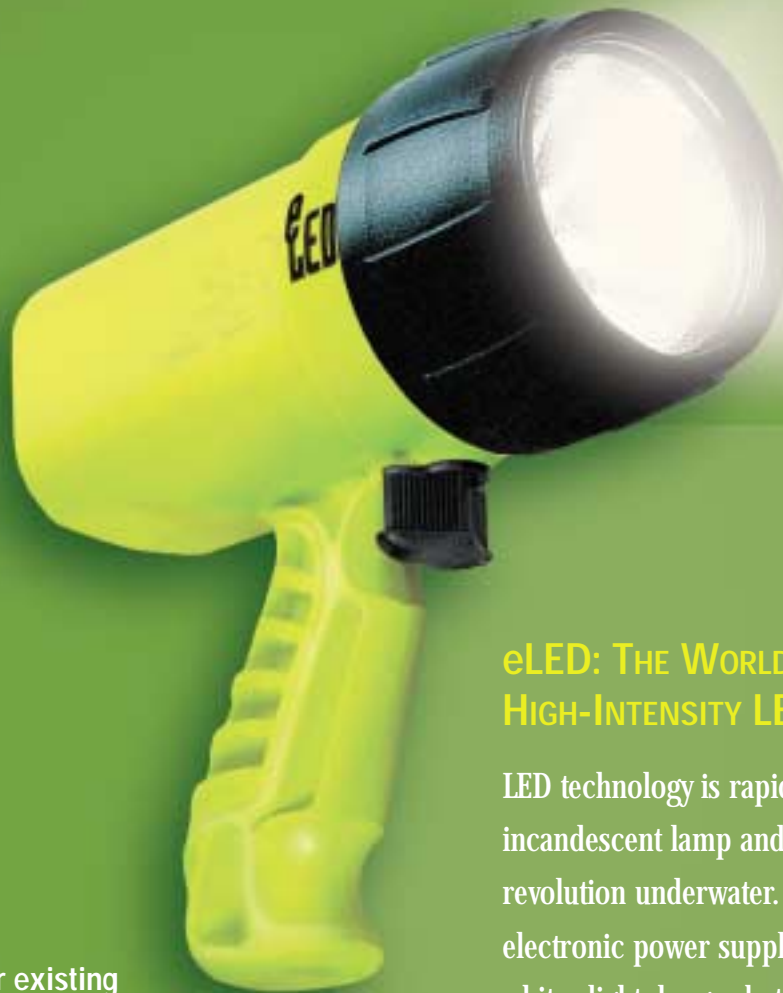

**BRIGHT
NEW
TECHNOLOGY**

Now Available for Dive Retailers!

Upgrade your existing C4/C8 lights with a UK eLED Module available separately.

**eLED: THE WORLD'S FIRST
HIGH-INTENSITY LED DIVE LIGHT.**

LED technology is rapidly replacing the incandescent lamp and UK is leading the revolution underwater. Driven by a miniature electronic power supply, eLED by UK delivers whiter light, longer battery life and higher performance for better dives. See for yourself at your UK dive retailer.

Edison Just Rolled Over.

Introducing UK eLED Technology for Dive Lights.

The lighting revolution is on and UK is leading the way in underwater lighting. The incandescent lamp invented by Edison is being replaced by a solid state LED illumination driven by miniature electronic power supplies. The eLED by Underwater Kinetics brings you state-of-the-art LED illumination adapted for use underwater. Check out these features and compare the benefits to conventional Edison style lighting

FEATURES

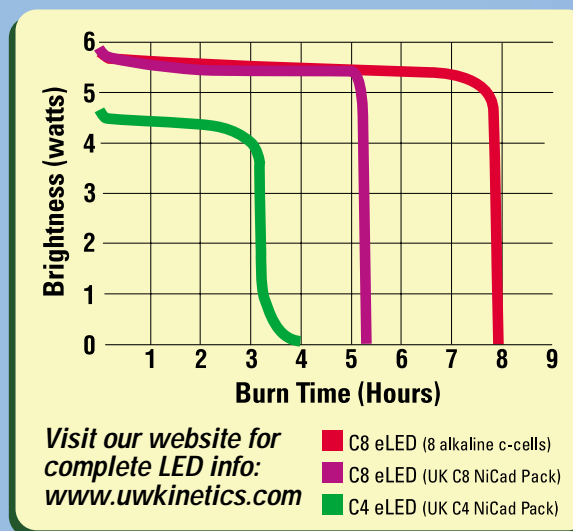

- Sunlight-bright 5500°K white beam
- White LED light travels farther through water for maximum visibility
- External switch toggles for high or low beam
- Batteries last twice as long with eLED
- Power control delivers more constant light output
- LED will not break when dropped – no glass or filament
- Lasts over 30x longer than conventional lamps
- Legendary UK warranty and devotion to quality

SPECIFICATIONS

POWER	6 watts (full power), 3 watt (half power)
BRIGHTNESS	130 Lm (max)
LAMP	6 watt InGaN white LED
COLOR TEMP	5500°K (typical)
FULL POWER BURN TIME	Alkaline Cells: 6.5 Hr (C4), 7.75 Hr (C8) UK NiCad Pak: 3.25 Hr (C4), 5.25 Hr (C8)
BATTERY	4 alkaline* c-cell (C4), 8 alkaline* c-cell (C8) UK C4 NiCad Pak (C4), UK C8 NiCad Pak (C8)
SIZE	3.2" dia x 5.2" (C4), 3.2" dia x 7" (C8)
DEPTH	500'
MATERIALS	ABS/Polycarbonate, PP rubber, aluminum

* NiCad or NiMH rechargeable batteries may also be used

eLED: BURNS BRIGHTER LONGER.
